

# Fish tank **light** system

## Key benefits

- Supports fish development
  - Custom lightning profiles promote smoltification and maturation
- Flexible control
  - DALI-based system allows dimming, grouping, and scheduling – easily integrated with existing PLC systems.
- Efficient and reliable
  - LED technology ensures low energy consumption and lifespan
- Complete solutions
  - Includes top an underwater light, suspension system, control cabinet, and pole setup in AISI316 stainless steel
- Plug and Play installation
  - Designed for easy setup and operation – ready to use with wi-fi access

For more information, please visit our website

# Underwater lights

- 150W
- Product color
  - Black and blue
- Default light color
  - Green
  - Other colors on request
- Materials
  - PE
  - AISI316

For more information, please visit our website

# Complete **light** systems

Complete Lighting System for  
Aquaculture

Optimized lighting for fish  
welfare and growth

## **System includes**

- Light pole in AISI 316 stainless steel
- Top-mounted and underwater lights (depth-dependent)
- Mounting materials in PVC-coated AISI 316 wires
- DALI-controlled cabinet
- Seasonal and intensity control system
- 

## **Optional Add-ons**

- UPS backup
- PLC integration

For more information, please visit our website

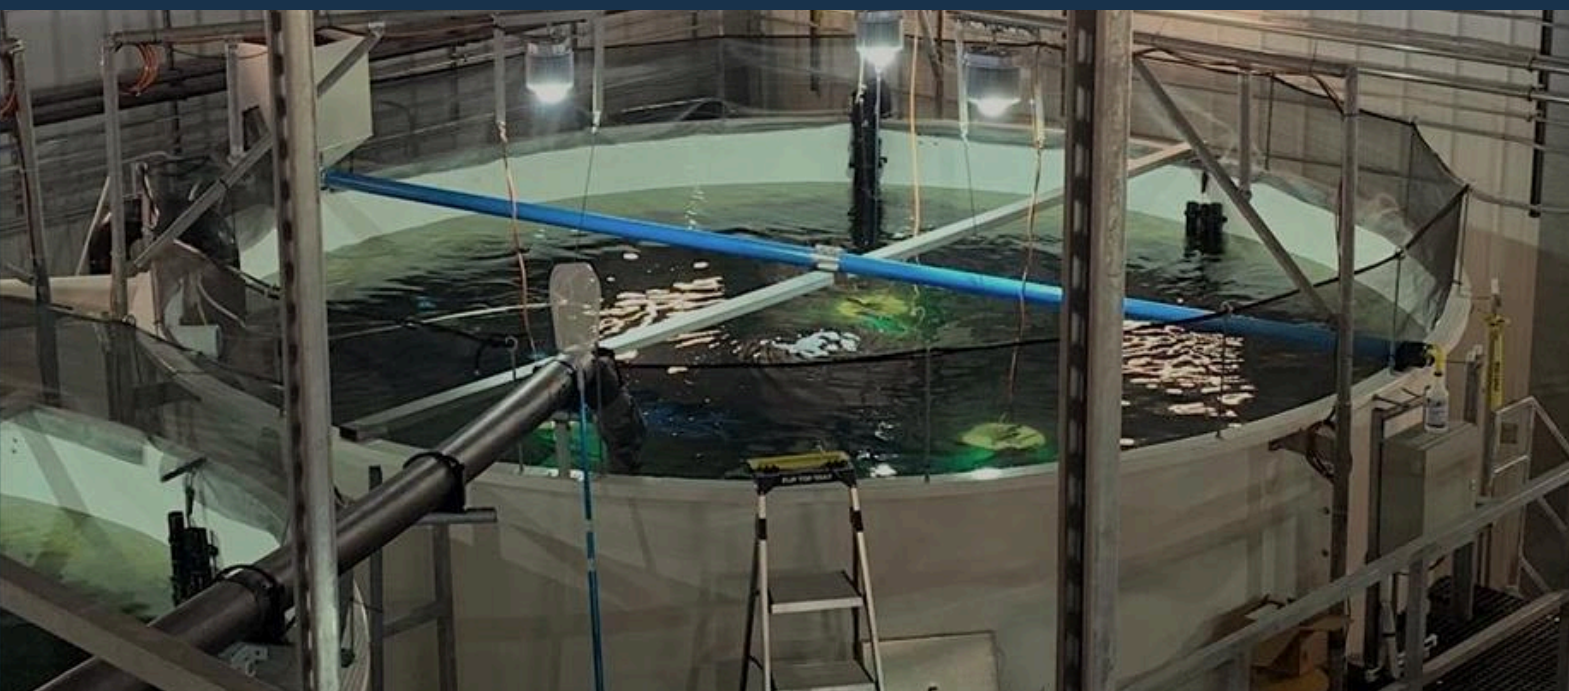

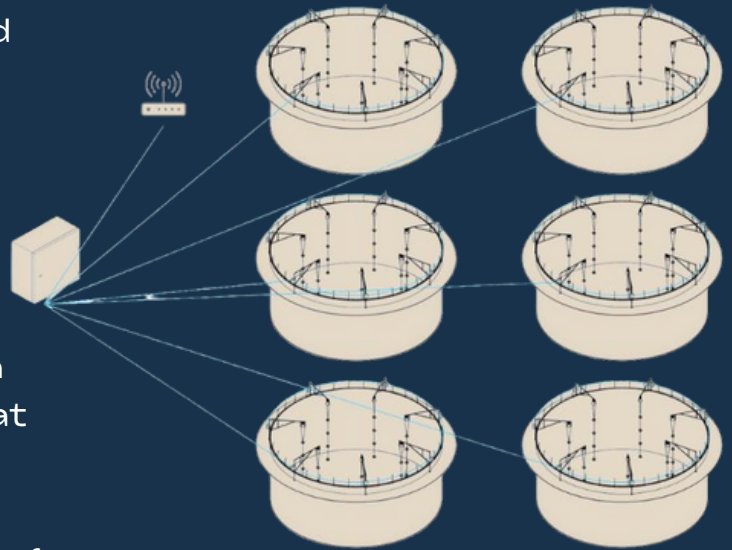

# Flexible light system

## Lighting control system

- Lighting can be dimmed as needed
- Light can be grouped and adjusted when water levels are lowered during fish transfer
- Optional UPS system ensures backup during power outages and enables emergency shutdown profiles

The complete lighting control system allows operators to manage lighting at tank level, with WIFI connectivity. Our systems use DALI technology, which is easy to integrate with existing PLCs or control systems.
